

REMARKS

This paper is filed responsive to the Office Action mailed February 5, 2010. Claims 50-66, 68-73, 77-80, 81-83 and 86-88 are pending in the application. Claims 1-49, 67, 74-76, 84 and 85 are canceled. Claims 53, 69 and 87 are amended. No new matter is added.

Applicants note with appreciation that the Examiner has indicated that claims 80-83 and 86-88 are allowable. Applicants have amended claim 87 to correct an obvious error. The Examiner has also indicated that claims 73, 76 and 79 would be allowable if rewritten to include the limitations of the base claim and any intervening claims. Applicants have amended claim 69 to include the elements of claim 76, and submit that the resulting amended independent claim 69 and the claims that depend therefrom are allowable. Applicants have added new independent claim 89, which includes the elements of claims 69 and 73, and new independent claim 90, which includes the elements of claims 69, 77 and 79.

Claims 50-66, 68-72, 77 and 78 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 7,416,533 (Gellman et al.). Applicants have amended the claims as suggested and therefore the rejection is moot. Applicants reserve the right to argue the rejection at a later date in connection with a subsequently filed application that claims priority to this application.

Applicants submit that the claims are in condition for allowance. Please charge any fee associated with the prosecution of this application to Deposit Account No. 10-0750.

Respectfully submitted,

/Brian S. Tomko/
